

## From the Principal's Desk

Teaching and learning is a journey in itself and I feel blessed to be a part of this never ending learning process. Nothing can inspire me more than the bright and inquisitive eyes of my students. Our college strives to create an environment of active involvement, innate desire to reason and discover one's own self as well as to develop respect for others and the society as a whole. As a constantly growing institution we combine the best educational practices to transform our students into **"the citizens of the world."**

The youth should study socio-economic growth and philosophical history of the world. Good salary package may make them economically prosperous but may not necessarily bring happiness and contentment. Prosperity minus peace of mind and happiness is meaningless and defeats the very purpose of education.

The students who are seeking higher education in colleges are in a better position to understand human-values and can contribute to the society and the purpose of education is thus well served.

I have a long association with this college as a teacher and wish that students do their utmost to make this old institution most successful thereby excelling neighboring institutions as a centre of excellence.

A handwritten signature in green ink, appearing to read 'D. Dharela', with a long horizontal stroke extending to the right.

Dr. (Mrs. D. Dharela)
