Report

Group Competition (Topic: - ASP.NET Technology ASP Server Controls and Html Control Uses In Website)

Introduction

A group competition activity was successfully conducted in Lab-1 by the BCA/PGDCA Department. The primary objective was to enhance practical skills and presentation abilities among students by focusing on ASP Server Controls and HTML Controls.

Activity Details

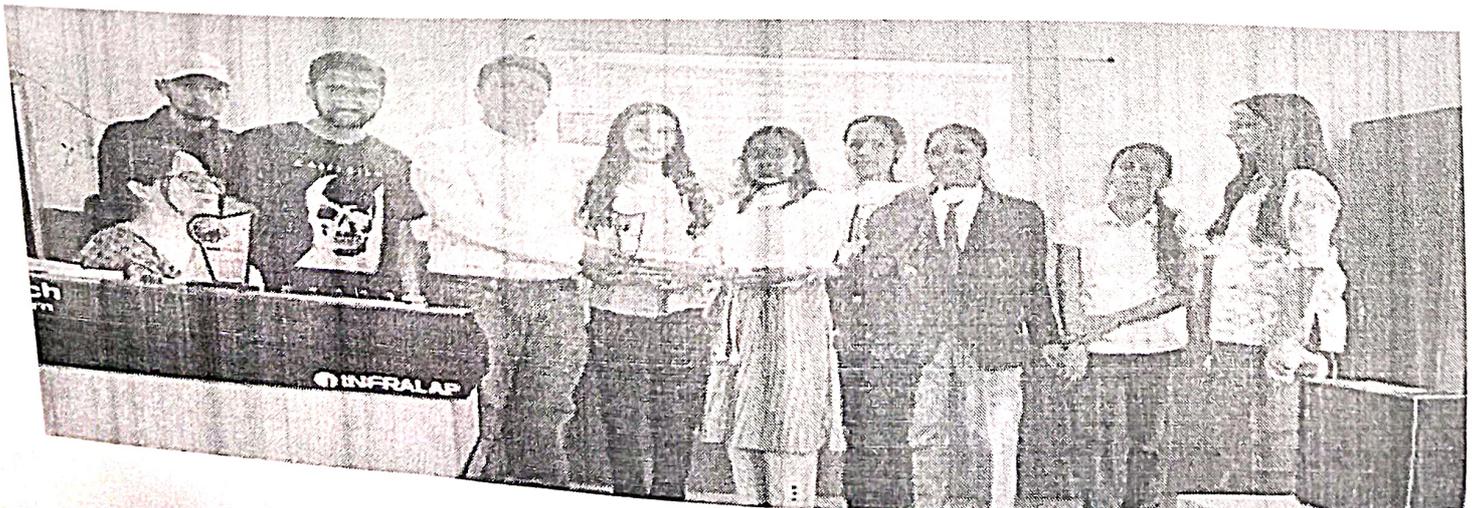

All participating student groups performed hands-on exercises and delivered presentations centered on the practical implementation of ASP.NET Server Controls (such as TextBox, Button, Label, DropDownList) and standard HTML Controls with server-side processing attributes. During this activity, the groups showcased web applications demonstrating:

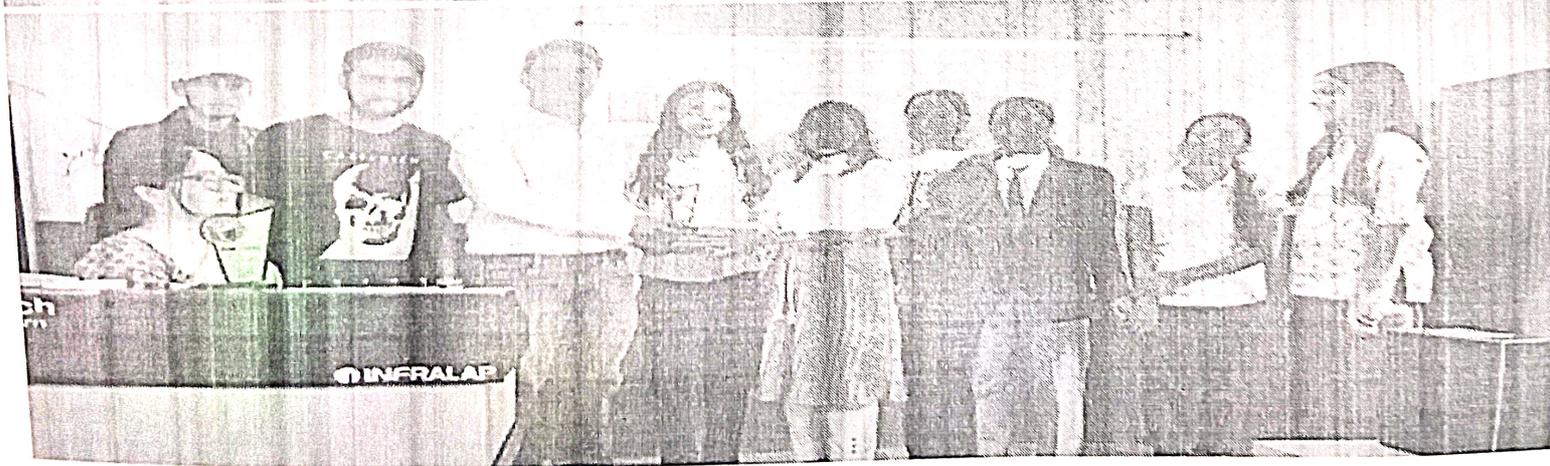

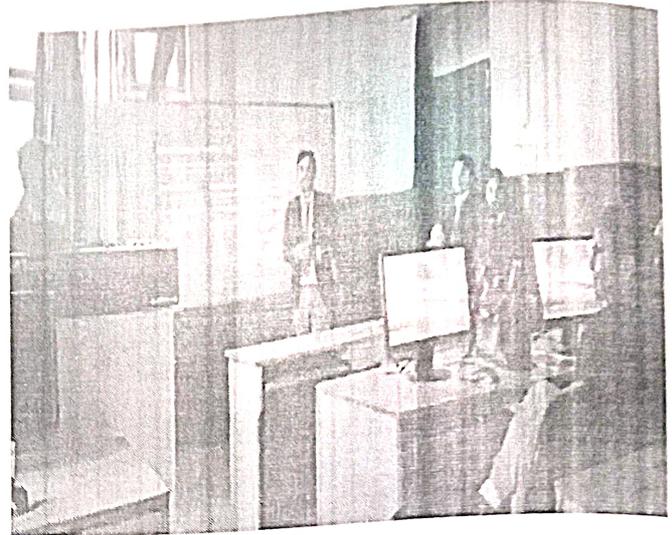

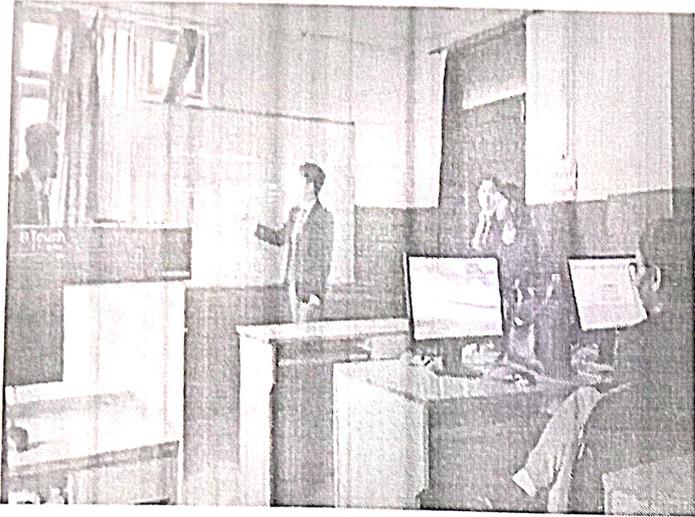

- Usage of server-side controls in ASP.NET with properties like `runat="server"` and unique IDs.
- Integration and comparison of basic HTML controls versus ASP.NET web controls.
- Coding best practices for event handling and state management.

Presence of Coordinator

The activity was conducted in the presence of the department coordinator, who supervised all practicals and presentations, ensured participation, and provided real-time feedback to the groups.

Outcome -The session provided an opportunity for collaborative learning and practical exposure to server controls in ASP.NET, preparing students for advanced web development tasks. The active participation of the coordinator contributed significantly to the discipline and learning environment during the event.
